## Minutes of the 15<sup>th</sup> meeting of ISO/TC 12 held on 2018-05-23 on WebEx

### 1 Opening of the meeting (13:30 h GMT+2) Doc. ISO/TC 12 N 1240

The ISO/TC 12 Chair, Prof. Pendrill, welcomed the delegates and opened the meeting.

He introduced the topic of the meeting [N 1240] and he thanked ISO/TC 12/WG 19 for their dedicated work on the revision of the ISO 80000 series.

### 2 Roll call of delegates Doc. ISO/TC 12 N 1242

There were delegations present from 6 P-members; ANSI (USA), BIS (India), DIN (Germany), JISC (Japan), SFS (Finland) and SIS (Sweden) and 2 type A liaison organisations; BIPM and EURAMET.

The participants presented themselves, see doc. N 1242.

### 3 Adoption of the agenda Doc. ISO/TC 12 N 1240

The agenda, Doc. N 1240, was adopted as presented.

### 4 Appointment of the drafting committee

Prof. Grimvall (Sweden) and Dr. Härmäläinen (Finland) were appointed to the drafting committee, assisting the secretary to draft the resolutions of the meeting.

### 5 Discussion of the draft for FDIS 80000-1, Quantities and units - Part 1: General

#### 5.1 Introduction to the topic Doc. ISO/TC 12 N 1217, N 1232, N 1235, N 1236

The chair gave a brief resumé of the events leading up to the present situation. While last year's TC12 ballot on an earlier draft of part 1 of the ISO 80000 series revealed broad agreement, there remained two points which TC12 considered to be particularly significant that further work was needed before proceeding with the draft standard:

- A number of national mirror committees of TC12 had raised serious reservations about a proposed change in terminology [N 1232 and clause 5.2 below].
- How best to make references to the VIM in the latest draft of part 1

Since last year's ballot, the issue has been handled by TC12 on a number of occasions, including last autumn's plenary meeting of TC12 (particularly resolutions 108 and 109) [N 1192]; an extra WebEx 2018-02-23 [N 1217]; and other communications [e.g. N1235 and N 1236]. During the process, correspondence on this issue has been moved to ISO/CS, the JCGM and the CIPM leadership

## 5.2 Discussion and decision about clause 3, especially definition 3.9, Unit

**Doc. ISO/TC 12 N 1238 (main document)**, N 1228, N 1229, N 1230, N 1233, N 1239 (for further reading)

The difference between the current definition of the term "unit" and the proposed definition is seemingly very small; from "real scalar quantity, ..." to "real scalar quantity **value**, ...", however this fundamentally changes the definition. The current definition is also the definition given in VIM, International vocabulary of metrology produced by the JCGM. However, in the proposal for the latest draft of the 9<sup>th</sup> edition of the SI Brochure produced by the CCU (the consultative committee of the CIPM) the definition given in the proposal for ISO 80000-1 is given. The significant issues this proposed redefinition raises include those summarized in the documents N 1228, N 1229, N 1230, N 1233, where arguments both for and against the various aspects can be found.

There was an active discussion. It was noted that there is a need to have harmonised definitions in documents of all three organisations: CIPM, JCGM and ISO.

The result of the discussion, including a show of votes among the P-members present, was the adoption of the following Resolutions:

### **Document N 1241, Resolution 112 (WebEx 1/2018)**

**Action 1:** ISO/TC 12 concluded that the secretary would update the draft to reinstate the definition for 3.9 to read "real scalar quantity, ...", and make changes throughout the document as needed.

Noting Resolution 112, DIN requested to proceed to a second DIS ballot. The ISO Technical Programme Manager, Ms. Ferrés, clarified that there is no need for a second DIS: as the DIS was approved with comments resulting in technical changes being introduced into the text, the next step must be an FDIS ballot. It is worth noting there were DIS technical comments on the issue of concern.

ISO/TC 12 resolved that resolution 112 should be ratified by the full membership of ISO/TC 12 by a three-week Committee internal ballot.

### **Document N 1241, Resolution 113 (WebEx 2/2018)**

**Action 2:** ISO/TC 12 concluded that the secretary should conduct a three-week Committee Internal Ballot to ratify Resolution 1, starting **2018-05-25**.

**Action 3:** ISO/TC 12 tasked the secretary to convey the result of the Committee Internal Ballot, including any comments, to CIPM for their meeting 2018-06-21.

The ISO Technical Programme Manager, Ms. Ferrés, pointed out that, according to ISO editing rules, the reference to VIM must be given when definitions are reproduced from that document.

### **Document N 1241, Resolution 114 (WebEx 3/2018)**

### **Document N 1241, Resolution 115 (WebEx 4/2018)**

**Action 4:** ISO/TC 12 concluded that the secretary would add the correct references to the definitions in FDIS 80000-1, according to ISO/IEC Directives Part 2, where appropriate. The secretary will do this before **2018-06-22**.

NOTE: Due to technical problems with the WebEx, Dr. Milton was not able to enter the conversation at all points.

## **6 Requirements concerning a subsequent meeting**

The next meeting of ISO/TC 12 will be held October 8, 2018 in Helsinki, Finland, at the premises of SFS, the Finnish member body of ISO.

## **7 Any other business**

The ISO Technical Programme Manager, Ms. Ferrés, reminded that the revision of the 80000-series is submitted to stringent deadlines. Processing the documents in ISO/CS to prepare the FDIS will need a considerable amount of time. While the final drafts must be submitted to ISO/CS by early November, 2018 at the *very latest*, it is strongly advised that ISO/TC 12 Secretariat schedule submission of the various parts in the 80000-series starting June. ISO/CS will co-ordinate with ISO/TC 12 Secretary.

## **8 Approval of resolutions**

The resolutions were read out and approved.

## **9 Closure of the meeting (15:30 h GMT+2)**

The chair thanked once again ISO/TC 12/WG 19 for their dedicated work on the revision of the ISO 80000 series. He also thanked the participants of this extra ISO/TC 12 meeting for the fruitful discussion and closed the meeting.
