ISO Code of Ethics and Conduct

4. ISO Code of Ethics and Conduct

<https://www.iso.org/publication/PUB100011.html>

What and why?

The new **ISO Code of Ethics and Conduct** provides a single consolidated document applicable to the whole ISO community and replaces the ISO Code of Conduct for the technical work.

It was developed in consultation with the TMB and following best practices as set out in ISO 37000:2021 Governance of organizations — Guidance.

While the code doesn't cover every possible situation, the **goal** is to provide a framework and foundation for expected conduct.

Target audience

This Code sets out principles for the conduct of persons acting for or on behalf of ISO:

- individuals representing ISO members.
- ISO governance groups and their members.
- the ISO standards development community, including liaison organizations.
- the Central Secretariat (ISO/CS).

General principles

1. Comply with legal and statutory obligations.
2. Perform and act in good faith, consistent with the purpose, policies and principles of the organization.
3. Behave ethically.
4. Promote and enable all voices to be heard.
5. Engage constructively in ISO activities.
6. Declare actual and potential conflicts of interest and manage them appropriately.
7. Protect confidential information.
8. Protect ISO assets.
9. Avoid and prevent any form of bribery or corruption.
10. Escalate and resolve disputes and uphold agreed resolution.

5. Adoption of the Agenda, N1549
